

DEREK CYR

Courtice, Ontario | derekcyr4@gmail.com | 905-718-2452

PROFESSIONAL SUMMARY

IT professional with 3+ years of enterprise infrastructure and cloud operations experience across hybrid Microsoft environments. Hands-on with Microsoft Azure administration (VMs, storage, networking, monitoring), server administration via SSH and PowerShell automation, identity and access management (Entra ID, Active Directory, Intune), and security/compliance operations including SOC 2 evidence collection and Drata administration. Currently leading the identity architecture workstream for an upcoming Entra ID tenant migration. Looking to grow into broader ownership of infrastructure and identity programs, with a long-term interest in IT management.

CORE COMPETENCIES

Cloud & Infrastructure: Microsoft Azure, Azure Virtual Machines, Azure Storage, Azure Update Manager, Cloud Infrastructure Operations, Windows Server Administration, Linux/SSH Server Administration, Virtualization

Identity & Endpoint Management: Microsoft Entra ID, Active Directory, Microsoft 365, Intune, Identity Lifecycle Management, Role-Based Access Control (RBAC), Endpoint Management, Entra Tenant Migration

Security & Compliance: SOC 2 Compliance Support, Drata Administration, Identity Governance, Access Reviews, Security Monitoring (Nagios, Azure Monitor, Wazuh), Alert Triage & Remediation, SSL/TLS Certificate Management

Operations & Automation: PowerShell Scripting, SSH, IT Asset Management, Procurement (POs), Onboarding/Offboarding, Jira Service Management, Cherwell, Technical Documentation, Process Improvement

Professional Skills: Vendor Management, Stakeholder Collaboration, Incident Resolution, Project Leadership, Cross-Functional Coordination

PROFESSIONAL EXPERIENCE

Andromeda Software Inc. Remote, Ontario

IT Analyst 2026 – Present

- Administer Microsoft Azure infrastructure — including virtual machines, storage, networking, monitoring, backups, and lifecycle operations — alongside day-to-day server administration via SSH and PowerShell automation.
- Perform VM provisioning, migrations, configuration changes, patch management, and troubleshooting across Azure-hosted environments.
- Manage identity and access operations across Microsoft Entra ID, Active Directory, and Microsoft 365, including user lifecycle management, security groups, RBAC, licensing, and access governance.
- Selected to lead the identity workstream for an upcoming Entra ID tenant migration, acting as primary point of contact for planning, execution, and post-migration access support.
- Support endpoint management through Microsoft Intune, including device enrollment, Autopilot provisioning, configuration profiles, and compliance policies.
- Run daily infrastructure health checks across Nagios, Azure Monitor, and Wazuh, triaging critical alerts and driving remediation to maintain system uptime and security posture.
- Administer Drata for SOC 2 compliance, supporting control monitoring, evidence collection, access reviews, and audit readiness.
- Process purchase orders and manage IT procurement, and lead onboarding/offboarding across identity, endpoint, and access systems for new and departing employees.
- Maintain technical documentation, asset records, and operational procedures while collaborating with senior IT staff on infrastructure improvements and incident resolution.

Kawartha Dairy Bobcaygeon, Ontario

IT Technician II 2025 – 2026

- Led enterprise-wide POS refresh across 20 stores and 60+ devices — coordinating 10 internal departments and 20+ external vendors — delivering on schedule with zero major operational disruptions.
- Cut endpoint provisioning time by ~40% through PowerShell automation and standardized imaging workflows, enabling faster, error-free deployments across distributed locations.
- Oversaw ~\$1M in annual IT operational spend including licensing, POS infrastructure, connectivity, and security systems; tracked expenditures against budget and identified cost-optimization opportunities.

- Drove NetSuite ERP implementation and optimization, aligning system configuration with business workflows and access governance standards to ensure data integrity and compliance.
- Administered Microsoft 365 and Entra ID environments, managing full identity lifecycle, role-based access controls, and license governance for 200+ users across the organization.
- Developed and maintained standardized operational documentation and IT runbooks, reducing repeat incidents and enabling consistent multi-site service delivery.

Durham CollegeOshawa, Ontario

*IT Analyst*2023 – 2025

- Administered Active Directory and Microsoft 365 for a multi-campus environment, managing identity lifecycle, RBAC, and compliance standards supporting thousands of academic and administrative users.
- Contributed to large-scale endpoint deployment initiatives, improving imaging and provisioning efficiency by 30%+ and reducing deployment-related downtime across campus.
- Partnered with academic and administrative stakeholders to support critical instructional technology and infrastructure operations, ensuring high availability during peak academic periods.
- Operated within an ITSM framework (Cherwell) to resolve incidents in alignment with defined SLAs, contributing to measurable improvements in first-call resolution rates.
- Standardized service documentation and knowledge base articles, reducing repeat escalations and improving cross-team consistency in service delivery.

TECHNICAL PROJECTS & HOME LAB

Self-Directed Home LabOngoing

Proxmox / Windows / Linux

- Designed and maintained a Proxmox-based virtualized environment hosting Windows Server and Linux VMs to simulate enterprise infrastructure.
- Implemented VLAN segmentation and WireGuard VPN for secure, segmented remote access, modeling real-world network security and access control architectures.
- Automated provisioning, backup validation, and monitoring workflows, reinforcing operational reliability and reducing manual intervention.
- Model hybrid identity governance environments integrating on-prem AD with cloud-based Entra ID, applying RBAC and licensing management principles aligned to enterprise standards.

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104) — In Progress
- Cisco CCNA v7 Enterprise Networking, Security & Automation
- AWS Cloud Technical Essentials
- Google IT Support Professional Certificate

EDUCATION

Durham CollegeOshawa, Ontario

*Advanced Diploma — Computer Systems Technology*Graduated 2023

- Completed enterprise IT curriculum: Windows Server, Active Directory, VLAN networking, virtualization, and structured troubleshooting methodologies.
- Designed and deployed simulated hybrid environments integrating on-premise infrastructure with cloud services, incorporating identity management, backup/DR strategies, and operational documentation aligned to enterprise governance standards.
