PROFESSIONAL SUMMARY

IT professional with 4+ years of enterprise infrastructure and cloud operations experience in hybrid Microsoft environments. Currently administer a multi-tenant Azure environment of 400+ VMs across 24 subscriptions spanning North America and Europe, supporting multiple portfolio companies with strict data and environment segregation. Selected to lead the identity workstream for an Entra ID tenant migration and will own the tenant post-migration. Track record of leading cross-functional initiatives, coordinating internal teams, external vendors, and multi-six-figure budgets, with a long-term goal of progressing into IT management and director-level leadership.

PROFESSIONAL EXPERIENCE

Andromeda Financial Software Inc.

IT Analyst

Remote, Ontario

2026 – Present

- Selected to lead the identity workstream for an active Entra ID tenant migration, serving as primary point of contact with a third-party implementation partner and owning the tenant once migration is complete.
- Administer a multi-tenant Microsoft Azure environment spanning 400+ virtual machines across 24 subscriptions in North America and Europe, supporting multiple portfolio companies with dedicated environment and database segregation per company.
- Manage identity and access operations across Microsoft Entra ID, Active Directory, and Microsoft 365, including account provisioning/deprovisioning, security groups, RBAC, and license governance across a segregated multi-company environment.
- Administer Drata for SOC 2 compliance, supporting control monitoring, evidence collection, access reviews, and audit readiness across the organization.
- Perform Windows and Linux server administration via SSH and PowerShell automation across a geographically distributed, multi-region infrastructure footprint, with scripts and configurations version-controlled in GitHub.
- Support endpoint management through Microsoft Intune, including device enrollment, Autopilot provisioning, configuration profiles, and compliance policies.
- Run daily infrastructure health checks across Nagios, Azure Monitor, and Wazuh, triaging critical alerts and driving remediation to maintain uptime and security posture.
- Own IT procurement, invoicing, and purchase order processing for software licensing, coordinating with vendors across the portfolio.
- Lead onboarding/offboarding across identity, endpoint, and access systems for new and departing employees; maintain technical documentation and asset records.

Kawartha Dairy

IT Technician II

Bobcaygeon, Ontario

2025 – 2026

- Led enterprise-wide POS refresh across 20 stores and 60+ devices, coordinating 10 internal departments and 20+ external vendors, delivering on schedule with zero major operational disruptions.
- Oversaw ~\$1M in annual IT operational spend including licensing, POS infrastructure, connectivity, and security systems; tracked expenditures against budget and identified cost-optimization opportunities.
- Cut endpoint provisioning time by ~40% through PowerShell automation and standardized imaging workflows, enabling faster, error-free deployments across distributed locations.
- Drove NetSuite ERP implementation and optimization, aligning system configuration with business workflows and access governance standards to ensure data integrity and compliance.
- Administered Microsoft 365, Entra ID, and core server infrastructure, managing full identity lifecycle, role-based access controls, and license governance for 300+ users across the organization.
- Developed and maintained standardized operational documentation and IT runbooks, reducing repeat incidents and enabling consistent multi-site service delivery.

Durham College

IT Analyst

Oshawa, Ontario

2022 – 2025

- Administered Active Directory and Microsoft 365 for a multi-campus environment, managing identity lifecycle, RBAC, and compliance standards supporting thousands of academic and administrative users.

- Contributed to large-scale endpoint deployment initiatives, improving imaging and provisioning efficiency by 30%+ and reducing deployment-related downtime across campus.
- Partnered with academic and administrative stakeholders to support critical instructional technology and infrastructure operations, ensuring high availability during peak academic periods.
- Operated within an ITSM framework (Cherwell) to resolve incidents in alignment with defined SLAs, contributing to measurable improvements in first-call resolution rates.
- Standardized service documentation and knowledge base articles, reducing repeat escalations and improving cross-team consistency in service delivery.

TECHNICAL PROJECTS

Self-Directed Home Lab

Proxmox / Docker / Windows / Linux Ongoing

- Architected a Proxmox-based virtualization environment hosting Windows Server and Linux VMs, secured with VLAN segmentation and WireGuard VPN for remote access.
- Manage self-hosted domain, DNS, and reverse proxy infrastructure, including Pi-hole, Cloudflare, and Nginx, supporting multiple personally hosted web services.
- Built and deployed a full-stack budgeting and ledger application with a dedicated database, containerized and hosted via Coolify.
- Monitor infrastructure health and uptime across VMs and services using Uptime Kuma and Nagios, with automated alerting.
- Use Git/GitHub for version control of automation scripts, infrastructure configurations, and application code.
- Model hybrid identity governance environments integrating on-prem AD with cloud-based Entra ID, applying RBAC and licensing management principles aligned to enterprise standards.

CERTIFICATIONS

- Microsoft Certified: Identity and Access Administrator Associate (SC-300), In Progress
- Cisco CCNA v7: Enterprise Networking, Security & Automation
- AWS Cloud Technical Essentials
- Google IT Support Professional Certificate

EDUCATION

Durham College - Oshawa, Ontario

Advanced Diploma, Computer Systems Technology Graduated 2025

- Completed enterprise IT curriculum: Windows Server, Active Directory, VLAN networking, virtualization, and structured troubleshooting methodologies.
- Designed and deployed simulated hybrid environments integrating on-premise infrastructure with cloud services, incorporating identity management, backup/DR strategies, and operational documentation aligned to enterprise governance standards.

SKILLS & COMPETENCIES

Cloud & Infrastructure: Microsoft Azure (VMs, Storage, Networking, Monitoring), Multi-Subscription Environments, Multi-Tenant Data Segregation, Windows Server & Linux/SSH Administration, PowerShell Automation, Virtualization (Proxmox), Containerization (Docker/Coolify), Git/GitHub

Identity & Endpoint Management: Microsoft Entra ID, Active Directory, Microsoft 365, Intune, Entra Tenant Migration & Architecture, Identity Lifecycle Management, RBAC, Endpoint Management

Security & Compliance: SOC 2 Compliance Support, Drata Administration, Identity Governance, Access Reviews, Security Monitoring (Nagios, Uptime Kuma, Azure Monitor, Wazuh), DNS & Reverse Proxy Management (Nginx, Cloudflare, Pi-hole), Alert Triage & Remediation

Operations & Business: IT Procurement & Purchase Orders, Vendor Management, Software Licensing, Onboarding/Offboarding, Jira Service Management, Cherwell, Technical Documentation, Process Improvement

Professional Skills: Project Leadership, Stakeholder Collaboration, Cross-Functional Coordination, Remote Collaboration, Incident Resolution
